1 DIMENSION （1meter）

Light Bar (mm) ： **(** Length **)** 1000 x (Width) 400 x （Thickness）22.6
Power Supply (mm) ： (Length **)** 145 x （Width）400 x （Thickness）
134.5
Weight (KG) ： 3.68

2 INSTALLATION PROCESS
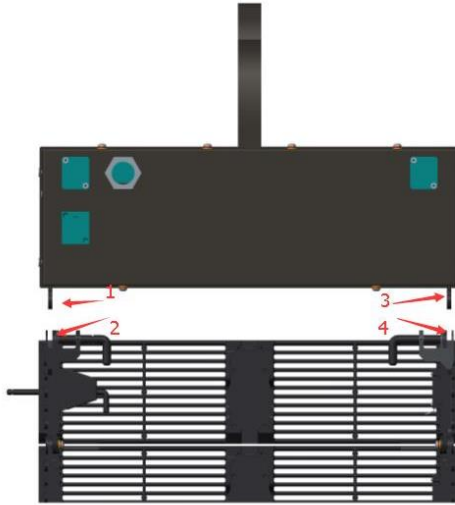

1. Assembly between Power Supply and Light Bar.

Power Supply

Light Bar (1m)
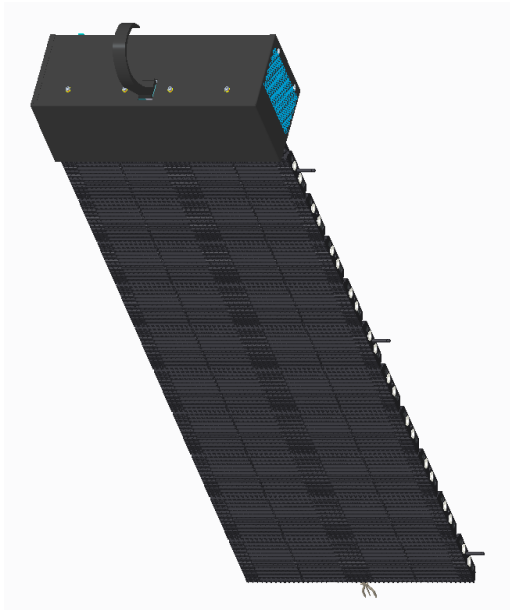

Insert the 1, 3 connecting pieces of the power supply box in to the slot 2&4 of the light bar

Insert the L pin into the pin hole and lock the pin with 90° spin.

Finish

## 2. Installation between Light Bars

2.1 Vertical Installation

Connect the connecting pieces 1&2 on both sides of the light bar, then connect the power supply cable 3&4.

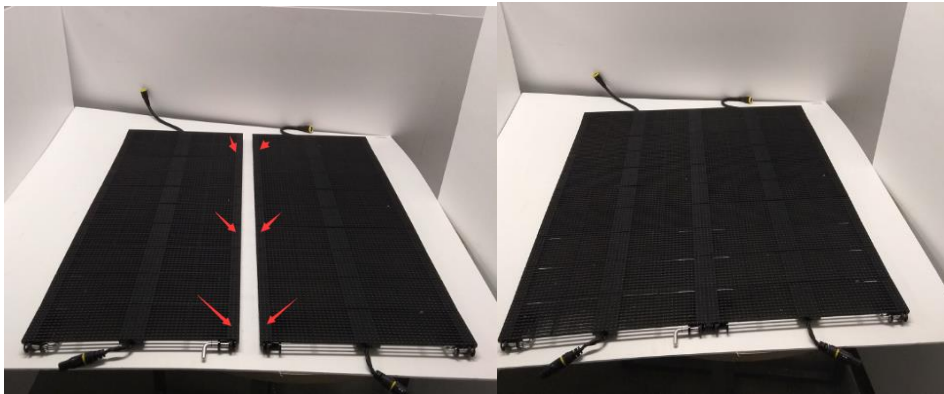

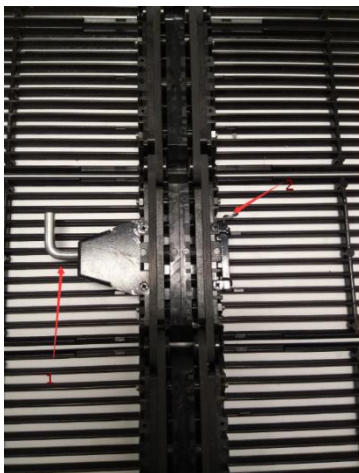

Finish (Back)

Finish (Front)

2.2 Horizontal Installation：（Front and back）

Using magnetic absorption technology, after alignment, within 2cm distance, the 2 light bars will adsorb to each other automatically. See the picture on the right side。

After the adsorption, in the back side, hold 2 and insert the 1(fix pin) to fix the connection.
